PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<ul style="list-style-type: none"> The author needs to address the topic under study. As it is, the author has not contextualized the study. The study is mixed up as the author jumps from one topic to another e.g. introduction (line 19) introduces economic development in China but jumps to new concept without linking them together. Use problem citation (check line 63) The author introduces migration but doesn't provide more information e.g. line 74.. this mass migration without showing or leading the reader. The study is more of Urbanization and industrialization. The author concludes on infrastructure rather than migration and its effects on land and labour. Generally, the author has the content but it is mixed up and it is confusing. I find it hard to understand what exactly the author wants to study. It is not coming out in the study. 	
Minor REVISION comments		
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
