

Editor's Comment:

I read the paper and the reports.

There are some remarks presented below:

- Reformulate the first phrase from Introduction (Page 1).
- Page 1, line 2-: write $F(x)^{\alpha-1}$ (that is, write x as variable for the first function F)
- Page 12, line 10-: write "5 Parameter's Estimation" (without ";")
- Page 17, in Conclusion: write correct Frechet; reformulate the last phrase.

After the above remarks are taken into consideration, and based on the referees' reports, my editorial decision for this paper is "Accept".
