

Editor's comment:

Dear Editor,

The article is current and well written. However we have some remarks:

- 1- Introduce the subject in the summary before presenting the objectives;
- 2- Review the minor confusions in material and method;
- 3- Alternate tables with figures, there are 7 tables, but no figures;
- 4- Refresh the old references.

Editor's Feedback:

My first question is not about materials. We need to make a small introduction on the theme to locate the reader who does not know "what it is an organic nutrient"? In other words, even if you start with the objectives, tell us the interest of organic nutrients before presenting the objectives.
