

Editor's Comment:

I had gone through the reviewer comments and final version of the paper.

As there are no technical issues in the reviewer comments, but I feel some modifications may be implemented before ACCEPTANCE.

The authors should consider the following suggestions.

- 1) Before publishing, see that tables should not come half on one page and half on other page. (Table should be in single page).
- 2) Authors should indicate the standards followed, if any.
- 3) References are not properly formatted.
- 4) References should be cited in the running text.
- 5) Chapter numbers should be given.
- 6) Paper should be as per journal format.
