

Editor's Comment:

Journal Name: Asian Journal of Physical and Chemical Sciences

Manuscript Title: Heat Transfer of Mixed Convection Electroconductivity Flow of Copper Nanofluid with Different Shapes in a Porous Micro Channel Provoked by Radiation and First Order Chemical Reaction

Author details: Alalibo .T Ngiangia and Nelson N. Akaezue

Manuscript Number: 2018/AJOPACS/46301

Authors have done some corrections on Manuscript. However, there are still some points, which need corrections on the file, Revised-ms_IAARJ_46301_v2.

In DISCUSSION, "Figure 2, shows" should be changed as "Figure 2 shows" no need to put comma after "Figure 2".

Similarly, the other parts of the text must be checked.

For example,

- i) "Figure 3, showed" should be changed as "Figure 3 shows",
- ii) "Figure 10, showed" should be changed as "Figure 10 shows",
- iii) "Figure 5, clearly demonstrate that, increase in peclet number correspond to a decrease in the skin friction of the nanofluid." may be written as "Figure 5 demonstrates clearly that the increase in peclet number corresponds to a decrease in the skin friction of the nanofluid.",
- iv) "(Ngiangia and Harry 2017)" is not in the same form as with the others etc.

Authors must read the paper carefully to improve the language of Manuscript before publishing in AJOPACS.

After these corrections, you can decide for acceptance (no need to send it me back).

Editor's Details:

Dr. Mustafa Boyukata
Professor, Department of Physics, Bozok University, Turkey
