

Editor's Comment:

1. Equations 1 and 2 in the section "Materials and methods" must be rewritten according to editorial board's suggestions because each of the expressions $AS_{n \times 0}$ (Equation 1) and $P_{n \times 0}$ (Equation 2) is equal to zero (0).
2. Table 3 needs some formatting. Legends of Y axes of Figures 1,2,3 "Respondents (%)", Figure 4 "Adaptation measures", and Figure 5 "Barriers of adaptation measures" should be directed vertically.
3. The discussion of the results has not been improved as per reviewers and editorial board comments
4. Authors did not make use of the comprehensive literature review made in the section "Introduction" not used in the discussion of the results.

Comments on the revised manuscript version 2 are attached herewith this e-mail.
