

Editor's Comment:

Please find attached my editorial decision as regards Ms ARJA 47358.

I consider the manuscript acceptable for publication after a lot of grammatical and semantic corrections (that had escaped preceding reviews and revision but are necessary to the good understanding of this paper) are considered by the authors.

This series of suggested corrections are underlined (green) in the attached corrected revision of the Ms.

Editor decision regarding Ms ARJA_47358

“Influence of Weather on Sugarcane Mealybugs and Their Natural Enemies”

This a paper of practical interest, that yet needs much improvement in grammatical and semantic aspects.

Thus, I strongly invite the authors to provide corrections as suggested (underlined in green) in the corrected version BEG.

After these corrections are taken into consideration, the manuscript deserves publication in Asian Research Journal of Agriculture.
