

**Editor's Comment:**

I agree with the suggestions of both reviewers and the revision of this manuscript.

However, there are some minor revisions needed to be solved before final acceptance.

1. Some editing errors needed to be corrected. E.g. "Material and Methods" should be "Materials and Methods"
2. The Conclusion section is too short. The authors should give more detailed conclusion. What is the implications for this study? what is your further study in the future?
