

Editor's Comment:

I have gone through the amended manuscript and I recommend this manuscript for publication.

However, I found that abstract is too long. Kindly highlight the main findings and conclusions of the research.

Secondly, rephrased the following sentence in abstract: "A total of 3,231.2 individuals/ha distributed in 53 species, 44 genera and 23 families were recorded in the study". Should be changed to "A total of 3,231.2 individuals/ha distributed in 23 families, 44 genera and 53 species were recorded in the study".
