

Editor's Comment:

2018/JAMMR/46102. The authors have carried out all reviewer's suggestions, but some editing mistakes are still present in the main text (AdS not defined in the abstract and LHRH not defined in par. 2.2; page 4 CORRECT will further; 2.4 Risk of testicular biopsy is the title of a paragraph and it can not be a continuation of par 2.3; ref 44 is presented within ref 43) and I do not find figures 1 and 2 very informative and necessary.

However, the overall quality rate of the manuscript is suitable for publication. Thus, the final decision is accept.
