

**Editor's Comment:**

With reference to our previous correspondence, I send my opinion concerning the manuscript entitled "Tolerance and Phenotypic Analysis of Irrigated Rice Genotypes under Iron Toxicity" (JEAI 46898).

The manuscript is well-written and received high marks from reviewers. However, I have a reservation to the data indications in table 2.

I am asking for additional explanations in this regard. I do not understand why the authors state that the varieties, eg AB08057 (4.1a) and AB09028 (4.2b) differ from each other, while the varieties, e.g. AB08057 (4.1a) and CNA0005014 (1.6a) do not differ from each other.
