

Editor's Comment:

I am returning the partially corrected manuscript and suggested revisions required.

May be published after revision.

**Revisions Required for
Behavior of Isolated Footings Reinforced Randomly by Glass Fiber**

1. Check language, style, symbols accordingly – *corrected in manuscript randomly by Editor to help authors*
2. Paragraph sub- headings – in Para 1 are removed since descriptions are meager
3. Water – ppm of salt content is important – mention it since it is very important.
4. Fig (3) applied strain gauges – give better Figure for Gauge
5. If possible arrange Figures and Tables in single page with proper legends having inset – seems to be clumsy.
6. Error should be certainly included in shown places in the result. Calculate and show in results and discussion section.
