

Editor's Comment:

Please, consider the following points:

- 1- Line 96: the reference (Struve et al., 2003) is missed in final references list
- 2- Lines 163 & 165: make *Staphylococcus aureus* italic while staphylococci is not
- 3- Line 294: Match the name with that in final list Feglo and Nkansah [33]
- 4- Make (ssp.) in whole article including tables not italic

The decision is accept after the minor revision.
