

Editor's Comment:

I found the manuscript "Induction of Anthocyanin Production in Established Callus Cultures of Roselle (*Hibiscus sabdariffa* L.) Using Yeast Extract" needs minor revision before being accepted for publication.

-It will be better to revise and check English of the introduction and the conclusion.

-Why Figure 3 presented in the original manuscript was deleted?

-Results and discussion part contains very few references. It should be improved to valorize obtained results.

-References should be re-checked.
