

Editor's Comment:

Manuscript "Japan's Demographic-Momentum on a Deflationary Spiral Tracing a Path toward Extinction: Ecological Economics of a Declining Population (# 2018/JSRR/44788)" was evaluated by a number of experts and the authors incorporated suggestions to improve. It is now in good shape and suitable for publication in the Journal of Scientific Research and Reports.

It is suggested to verify following sentence of the conclusion and referring an article in Conclusion [9] (line 294), it was not referred in the text.

"To be brief, it is <a virtual equilibrium population ÷ the current population>."
