

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Asian Food Science Journal
Manuscript Number:	Ms_AFSJ_40694
Title of the Manuscript:	REPRODUCTIVE TOXICITY & BIOMARKER RESPONSE TO A DAILY DOSE OF INDOMIE SEASONING IN MALE ALBINO RATS (<i>Rattus norvegicus</i>)
New Title of the Manuscript:	REPRODUCTIVE & BIOMARKER RESPONSE TO A DAILY DOSE OF INSTANT NOODLE SEASONING IN MALE ALBINO RATS (<i>Rattus norvegicus</i>)
Type of Article:	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
I would suggest to carefully read the previous comments, and those parts still missed and difficult to implement consider to put to the `study limitation` paragraph.	<p>Thank you for your kind suggestion,</p> <p>Every research has its specific areas (Aims) it wants to achieve based on research knowledge, literature review and experimental observations in line with the funds and plans from initiation. The areas handled in this study were clearly evaluated and planned out and successfully executed.</p> <p>I don't agree with an extensive paragraph discussing study limitation.</p> <p>For this study, the points claimed to be missed were not planned for and as such are not deemed missed by the authors.</p> <p>(Missing many points like: Age of animal; Diet before and after treatment; Did rats consume any food other than INDOMIE treatment?)</p> <p>These highlighted points have been addressed in the methodology section of the manuscript. Information in the manuscript addresses the specific title of the manuscript.</p>
