

SDI Review Form 1.6

| | |
|--------------------------|---|
| Journal Name: | Advances in Research |
| Manuscript Number: | Ms_AIR_38544 |
| Title of the Manuscript: | Growth, Yield and Economics of Bt Cotton as Influence by Land Configuration and Nutrient Levels Under Rainfed Condition |
| Type of the Article | Original Research Article |

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

PART 1: Review Comments

| | Reviewer's comment | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|--|--|--|
| <u>Compulsory</u> REVISION comments | First, this work needs a better literature review, mainly to help the authors explain the results. The authors are strongly familiar with the significance of the statistical tests, without however explaining the statistical procedure adopted. In addition, I recommend reading "R. WEBSTER Regression and functional relations" to assist the authors in understanding the relationships between variables. | As per study we included good literature review even with this some more added to review Fisher's method of analysis of variance was applied for analysis and interpretation of the data. The level of significance used in 'F' test was at 5% (P = 0.05). Critical difference values were calculated whenever 'F' was significant. |
| <u>Minor</u> REVISION comments | | |
| <u>Optional/General</u> comments | | |
