PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
I feel it was a fair attempt by the authors but the justification and relevance of the study was not in any way revealed. I will suggest the authors discuss the essence and implications of ownership of the various categories of animals found in this study and probably link the preference of such animal ownership to cultural, social or financial reasons	The authors have noted the reviewer's comments and have appropriately attended to all the observations of the reviewer.
