

**SDI Review Form 1.6**

Journal Name:	<a href="#">Asian Journal of Agricultural Extension, Economics &amp; Sociology</a>
Manuscript Number:	Ms_AJAEES_32214
Title of the Manuscript:	EFFECTS OF FERMENTER TECHNOLOGY ON THE YIELD OF VARIOUS CROPS IN MALAKAND DIVISION
Type of the Article	Original Research Article

**General guideline for Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

**SDI Review Form 1.6**

**PART 1: Review Comments**

	<b>Reviewer's comment</b>	<b>Author's comment</b> <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<b><u>Compulsory</u></b> REVISION comments	A substantial revision, including in English, has to be made. The work treats the anaerobic fermentation (biodigestion) with manure and the benefits of the biofertilizer generated in the production of the main crops of the region: tomato, onion and wheat. Nothing on the anaerobic fermentation process, the hydraulic detention time to obtain the material and/or the physicochemical and microbiological data that corroborate the efficiency of the biofertilizer were presented. It was presented the yield of the three main cultures, before and after the fermentation, without a number of tests performed, even if the student t test was applied, a statistical test that addresses the difference between the means	OK Corrected.
<b><u>Minor</u></b> REVISION comments		
<b><u>Optional/General</u></b> comments
