PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	It seems to be a qualified study. However, the summary, introduction and conclusion sections should not include the same expressions (painted in red). I have marked other fixes on the text. The conclusion section should be re-written and detailed. The use of passive structure in scientific studies is more appropriate.	I took into account the various comments of the reviewer to improve this document. I have also appropriately taken up the numbering of the citations.
