

**Editor's comment:**

Results are weak, it might be increased

**Author's feedback :**

Thank you sir for your comment it was quite expository because I met with senior colleagues in my department if they could further suggest what may be done to improve on the results and I was advised to enquire about what i need to do sir. I will be very grateful if you can assist with this sir as I would want the paper to be published with your esteemed journal. I had read through the paper again and I will be willing to attend to any of your suggestions sir.
