**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<p>1. Follow the journal's guidelines on citation and referencing. Ensure that all and only those references that were actually cited in the text are included in the list of references at the end of the paper. Double check the year of publication indicated in the citation and in the reference list since there seems to be inconsistencies, unless they are really different references. Double check also whether there is really one author or multiple authors for certain reference since there also seems to be inconsistencies in the in-text citation versus the reference list, unless again they are really different. (There are many of these "seem-to-be" errors in the text. There is a need to check the citations and references one by one.)</p> <p>2. The coefficient of variation for AE in Table 1 should be 117 and not 11.7. With this, there is also a need to revise the statement in line 256.</p> <p>3. The figures in lines 278, 303 and 332 seem to be similar. Retain the figure in line 278 and delete the other two.</p>	<p>Citations and referencing have all been cross checked and highlighted in yellow</p> <p>All the other areas suggested for review, correction or outright removal have been appropriately done and also colored yellow. Figures that were in line 303 and 332 have been deleted and figure in table 1 changed from 11.7 to 117 and statement in line 256 has been revised</p>
<b>Minor</b> REVISION comments
