

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Asian Journal of Agricultural and Horticultural Research
Manuscript Number:	Ms_AJAHR_48923
Title of the Manuscript:	Yield Contributing Characterization of 21F ₅ Lines of Aus Rice
Type of Article:	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>❖ The author should delete the number of genotypes from the title. Also, can change the title to Characterization of some AUS rice genotypes for yield traits</p> <p>❖ Also the author can increase the two tables I made to summarize the traits and classified the genotypes among the studied traits.</p> <p>❖ The manuscript can be considered as a characterization of these genotypes.</p> <p>❖ If the author show the significant differences between these genotypes it will be more valuable. Especially if analysis ANOVA and used LSD or Duncan to prove that these genotypes had large variability.</p>	<p>Thank you for your constructive suggestion.</p> <p>The manuscript has revised according to the suggestion.</p>
