**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<p>1. The paper is relatively good although the data used were quite old. But it seems that there is a need for a major revision of the paper simply because the paragraphs and sentences were poorly written. The use of more appropriate English words should also be seriously considered. For a far better construction of sentences and paragraphs that will lead to better comprehension by the readers, an English expert should be consulted. Afterwards, this paper may be reconsidered for a thorough review.</p> <p>2. In the revision of the paper, the journal's guidelines for citation and referencing should be followed. Note also that all citations in the text should have corresponding listing in the References section and all that were listed in the References should have been mentioned in the text.</p> <p>3. The Methodology section should also include statements as regards the permission granted by concerned authorities on the clear identification of the subject hospitals in this paper. Otherwise, the anonymity of the hospitals should always be maintained.</p>	Thank you for your valuable comment. All possible corrections has been done following your suggestion to improve the quality of the manuscript.
