EDITORIAL COMMENT'S on revised paper (if any)	Authors' response to editor's comments
In methodology there are a sub-heading statistical analysis but I cannot find it. The authors should calculate non-parametric methods due the small sample size.	The sub-heading statistical analysis is in the manuscript and has been highlighted and numbered as '2.3' under the Materials and Methods section for easy identification. The participants were selected consecutively and that accounts for the method that was used for selecting patients based on the small sample size calculated for the study.
