**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	It is an interesting descriptive work, since there is no information about the area. It must be corrected: Include a description of the methods used in the study. The denomination must be unified: plate are also figures and must be renumbered as figures. Plate 1 b, 2 a, 2 b and 4 b are very poor quality. Plate 2 is the same as Plate 7. If you do not have a different one, you must refer to it. Table 1: - what does it mean? Not detected?. Put it on the table.	Methodology – Field and Laboratory procedures, petrographic description of rocks. Yes, all the plates are now figures.  Some of the field photographs and photomicrographs were taken with low resolution cameras. Yes, that is appropriate to make reference.
<b>Minor</b> REVISION comments		We generally agreed with the reviewer.
<b>Optional/General</b> comments
