

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Asian Journal of Research in Animal and Veterinary Sciences
Manuscript Number:	Ms_AJRAVS_43991
Title of the Manuscript:	PERFORMANCE AND HEALTH STATUS OF ARBOR ACRES BROILER CHICKENS RAISED WITH ROUTINE ADMINISTRATION OF FLUOROQUINOLONES
Type of Article:	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>Major shortcomings of the former version are not eliminated. All recommendations of the reviewer are ignored without appropriate explanation of their point of view. Several references are added to the Ref list, however own experimental results about efficiency of fluoroquinolones are not compared with formerly published data. The authors specify in their comments that they used local standards for choosing dosage and time-table for medication. However, these claims are still absent in MS. The authors don't discuss how optimal are these schemes. Differences between the experimental groups in haematological indices are not discussed, however they are evident in some cases. AST indices look particularly confusing.</p>	<p>All recommendation by the reviewer has been improved upon.</p>
