PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>I have been go through the revised manuscript by the authors. I am not very happy to the authors feedback. It doesn't show the professional way. I wrote the comments based on the scientific manner. My comments just to enhance the quality of manuscripts.</p> <p>Based on the Materials and Methods subtopics Vitamins analysis: I have been suggested to the author to elaborate the methods and instruments that been used, however, the author still does not elaborate them. The author's comment was "However, detailing the procedure is not ideal since this will make the work cumbersome and uninteresting. Remember this is not a text book. Interested researcher can always consult books. Thanks"</p>	<p>1. We are sorry about our approach. It was well intended, not to make anyone feel bad</p> <p>Materials and Methods Thanks a lot for your kind suggestions; we have implemented your suggestions.</p>
