

EDITORIAL COMMENTS:

The manuscript illustrated exciting work, but there are points of limitation. The paper contains a nonoriginal work where the plagiarism is more than 40 %. Also, there are many English errors. On the other hand, the author should include one more group of animal study to evaluate the side effect of *Trigonella foenum-graceum* Extract alone(sham control).

AUTHOR'S FEEDBACK:

I make my effort to reduce plagiarism and English errors. Group 3 is a group of animal study to evaluate the side effect of *Trigonella foenum-graceum* Extract alone.
