

**SDI Review Form 1.6**

Journal Name:	<a href="#">Asian Journal of Research in Biochemistry</a>
Manuscript Number:	<b>Ms_AJRB_47256</b>
Title of the Manuscript:	<b>Plant protease inhibitors as a potential source for novel therapeutic agents: a review</b>
Type of the Article	<b>Review Paper</b>

**General guideline for Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

**PART 1: Review Comments**

	<b>Reviewer's comment</b>	<b>Author's comment</b> (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<p>Despite being an interesting review, it is not innovative. I found several reviews with this theme. So I would like you to make it clearer what the differential of the review is compared to the existing ones. What does it have to grow into the scientific world?;</p> <p>In addition, the text is too long. I missed pictures, diagrams, flowcharts in the middle of the text. I think maybe this will make the review more interesting and catch the reader's attention. Some suggestions are: a table with more objective information about the activity of each plant, schemes demonstrating the action of each type of inhibitor and what clinical effect this generates, etc.;</p> <p>Be more objective in conclusion, I find it very broad;</p> <p>Finally, review English, punctuation and spacing</p>	<p>The subject of Protease inhibitor is so board. There are some review on PI activity for different natural sources. But there is no review article on the <b>therapeutic activity of PI</b> from <b>Medicinal Plant</b>. I prepared a project proposal on PI from Medicinal plant. But during literature review I found that, there is no review article on the therapeutic activity of PI from medicinal plants. It led to write this review article. Therefore, I do not agree with the comment and I would like to ask you to consider the topic of the review as a specific one, not just on Protease inhibitors.</p> <p>The PI isolate from natural sources is a new interest in researches as Proteases are involved in pathogenesis of many human diseases. <b>To my view</b> It is an interesting research topic which may provide a valuable output to the scientific community as well as the public.</p> <p>I would like to present the review as it is.</p>
<b>Minor</b> REVISION comments		
<b>Optional/General</b> comments		

**PART 2:**

	<b>Reviewer's comment</b>	<b>Author's comment</b> (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Are there ethical issues in this manuscript?</b>	<i>(If yes, Kindly please write down the ethical issues here in details)</i>	Not applicable
