

SDI Review Form 1.6

Journal Name:	Asian Journal of Research in Computer Science
Manuscript Number:	Ms_AJRCOS_48066
Title of the Manuscript:	Deployment Internet of Things by Telecom Operators in Developing Countries (Case Study Telecom Operators in Yemen)
Type of the Article	Case study

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<ol style="list-style-type: none"> 1. Title needs re-phrasing to exactly convey the proposed concepts. 2. The usage of English language in the work needs thorough proof reading twice to make it reach an acceptable mark. 3. The sample size is too small to generalize the results. 4. Formatting instructions need to be removed from the paper. For instance in the header of section 1 5. The application of IoT in telecom sector is as such obvious and not very innovative. 6. The paper length is more than required. 7. The paper is basically a Case study and not a typical research paper. 8. The presented case study is more oriented towards Social sciences and business administration and management domain rather than in the computer domain. 	<ol style="list-style-type: none"> 1. The title has been modified according to your comments. 2. The language of the paper has been revised. 3. The questionnaire is for survey only and if we want to deploy these services there are many effect factors such as user desire, cost... so on. 4. The amendments were made in according to your notes. 5. But in developing countries such as Yemen, IoT is not implemented by operators because they believe infrastructure is inadequate. The purpose of the paper is to encourage and motivate operators in these countries. 6. Because it is a field study of two operators and the result of each operator has been analyzed separately. The paper was also shortened. <p>(7 And 8) The case study enriches the theoretical aspect, that important to deploy any new services, and this necessary in the planning stage which precedes the design stage.</p>
Minor REVISION comments		
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
