

Editor's comment:

Require Ethic Approval of Animal Study (Code or Number)

Experiments were carried out in compliance with the guidelines of the Ethical Principles in Animal Research adopted by Ethics of animal use in research committee (EAURC), Vet. Med. College, Cairo University, Egypt

(protocol no.07/ 2013).

“ but we have not approved by the appropriate ethics committee. Because we have not committee to approve Certificate. In, Faculty of Agriculture, Ain Shams University, or Mammalian and aquatic toxicology, CAPL, Agric. Res. Center, Dokki-Giza, Egypt.”

Certificate approved of animal research ethics committee. only in two places Cairo university, toxicology Division, National Research Centre and they only give a certificate to their staff only all over Egypt.
