PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>I already read the revised paper. But it seems there is not significant improvement, based on my suggestion. The result and discussion is too simple and short, with no comparison done in relation to the aim of research.</p> <p>To maintain quality of this journal, I suggest the author make a better revised.</p>	<p>The conclusion part has been modified.</p>
