EDITORIAL COMMENT'S on revised paper (if any)	Authors' response to editor's comments
My decision is accept the paper, but it is important that the authors describe the statistical tests to data analysis.	<p>Statistical Tests to data analysis are added as "The data was entered in Microsoft excel spread-sheet and analyzed using SPSS version 21.0. Data was presented as frequency tables. Categorical variables compared using Chi-Square test. A p-value of less than 0.05 at 95% confidence interval was considered statistically significant".</p> <p>We (Authors) thank the editorial board and all the reviewers for the great work done in adding meaning to our manuscript. We (authors) will forever be grateful for this great opportunity.</p>
