FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>Bleeding control both by care-providers and bystanders are very important to provide safe society and thus this theme is worthy to study.</p> <p>This study has some limitations: 1) study number was small, 2) if these questions are valid (for real-life) is not determined.</p> <p>Also,</p> <p>Introduction is long Discussion is short Authors should modify</p>	<p>Again the authors would like to thank the reviewer for his/her feedback!</p> <p>The author's wholeheartedly agree that the study was small and do anticipate to include more participants in the future to ensure further validity.</p> <p>After reviewing some of the information in the introduction, we do agree that it is better suited for the discussion. These areas have been modified.</p> <p>Thank you again for your time and consideration.</p>
