

## **EDITORIAL COMMENTS:**

- 1) Reviewers agree that the topic of the paper is interesting and the results are important.
  
- 2) Reviewers are ok with the publication of the paper under the condition that it should be given to "a native of English speaker for proofreading and corrections".
  
- 3) Citation and references should be sequenced (exp. [1], [2], [3],.. ), as they appear in the paper and be relevant to the topic being discussed.
  
- 4) The reference list should be formatted according to current scientific research paper standards.
  
- 5) The paper is not well formatted. There is no spacing between paragraphs. The font should be changed, etc. Must check the formatting guidelines of the journal.

My editorial decision is: Paper should be accepted for publication after major formatting and English corrections.

## **AUTHOR'S FEEDBACK**

**Ok**
