

SDI Review Form 1.6

Journal Name:	<a href="#">Asian Research Journal of Mathematics</a>
Manuscript Number:	Ms_ARJOM_48015
Title of the Manuscript:	Modules Whose Endomorphism Rings Are Right Rickart
Type of the Article	Review Paper

**General guideline for Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

**SDI Review Form 1.6**

**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<p>The following are comments about the article.</p> <p>In general, this article is well done because important results were found to extend the theory of Baer and Rickart rings on modules and to characterize such modules. This work deserves be accepted and to be published in a Mathematic Journal. However, the author(s) should take into account the following remarks.</p> <ul style="list-style-type: none"> <li>- Since some proofs of propositions, corollaries, and theorems are based from the References, the author(s) should check if those statements have the same hypotheses as the propositions, corollaries, and Theorem listed in the article.</li> <li>- In the Introduction, le last paragraph, there 2 notations of the set of integers <math>\mathbb{Z}</math> that are used.</li> <li>- In section 1, when you define the p-adic number, specify that p is a prime number. In the same paragraph replace</li> </ul> <p>"shows" by "show"          , "ia" by "is"          "remark 4.1" by "remark 2.1"</p> <ul style="list-style-type: none"> <li>- In the proof of proposition 2.7, in the 2nd line replace "follows" by "follow"</li> <li>- In corollary 2.4, replace "Then" by "then"</li> <li>- In the proof of corollary 2.6, remove the 1st word "theorem".</li> <li>- In the proof of corollary 2.9, the 1st line, remove the word "that"</li> <li>- In the theorem 3.1, the 1st line, replace "Then" by "then"</li> <li>- In the proof of (i) implies (ii) of theorem 3.1, explain how M is free</li> </ul>	The requested modifications have been made
<b>Minor</b> REVISION comments		
<b>Optional/General</b> comments		

**PART 2:**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
