

SDI Review Form 1.6

Journal Name:	Annual Research & Review in Biology
Manuscript Number:	Ms_ARRB_38157
Title of the Manuscript:	EVALUATION OF ANTIFUNGAL ACTIVITIES OF FIVE PLANT EXTRACTS AGAINST DOWNY MILDEW IN MUSKMELON (<i>Cucumis melo</i> L) CAUSED BY <i>Pseudoperenospora cubensis</i>
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>Between line 39 and 40 for Introduction, please insert one sentence of transition for example { Legume crop production is constrained by pests and diseases which severely impact the quantity and quality available in the value chain in the world and <i>Cucumis melo</i> L is no exception}.</p> <p>Line 65 to 74 Good method but where did-you inspire? From literature? Please indicate an author.</p> <p>Line 75 to 89 Good method but where did-you inspire? From literature? Please indicate an author. where did-you find this formular?</p> $\% \text{ germination} = \frac{\text{Germinated conidia}}{\text{Total counted conidia}} \times 100$ <p>Why did-you use this concentration? 10 µL of conidia suspension containing 1 x 10² conidia ml⁻¹</p> <p>where did-you find this formular?</p> $\text{PIMG} = \frac{(R1-R2) 100}{R1} \%$ <p>Statistical analysis is part of Material and method, It's must be describe</p> <p>Look like interesting results, but Statistical analysis must be describe and the discussion must be improved.</p> <p>The document must be improved.</p>	<p>The parts marked/highlighted in yellow colour were the effected corrections. Thanks</p>
Minor REVISION comments		
Optional/General comments	<p>The treatments and the control were replicated three times.</p> <p>Why did-you only have three replication? Are there some constraints ? It's could be interesting to have five replication for reducing experimental error</p>
