

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Current Journal of Applied Science and Technology
Manuscript Number:	Ms_CJAST_49049
Title of the Manuscript:	Effect of bio-fungicides on seed quality parameters and disease control in chilli seeds infected with Colletotrichum capsici
Type of Article:	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>As an example (I did not analyze the other tables in detail) the data in the first column of table 4 were ordered and are presented below:</p> <p>5.33 (13.34) b 7.33 (15.70) a 8.00 (16.42) a 10.67 (19.05) d 10.67 (19.05) d 12.00 (20.26) e 13.33 (21.41) b 14.67 (22.51) b 29.67 (32.99) c</p> <p>There are many inconsistencies that need to be addressed. (For example, as the lowest value (5,33) does not differ from the second and third largest values(13.33 and 14.67))</p>	<p>(1) The CD value presented here is 0.83 (first column of table 4) for differentiating values in parenthesis. Hence, 5.33 (13.34) and 7.33 (15.7), the values in parenthesis differ significantly, therefore different letters has been given (a, b). Similarly, different letters (c, d, e ..) has been given for subsequent higher values respectively.</p> <p>(2) As per the evaluator's suggestions, I have arranged values in increasing order for all the observations, in all the three tables and letters has been given as a, b, c ... from least value to higher respectively.</p> <p>(3) The changes made in the letters in table number 2,3 and 4 are highlighted in yellow colour.</p> <p>(4) The inconsistencies in lettering has been noted, accordingly modified and highlighted in yellow colour.</p> <p>(5) I thank for critical comments of the evaluators</p>
