

**EDITORS COMMENT:**

I am attaching my comments in the article.

Many shortage still there and it needs corrections, even he does not follow the journal guidelines in the preparation of the article.

**AUTHORS FEEDBACK:**

Change of TITTLE FROM DETECTION OF Chlamydia trachomatis IN DONATED BLOOD AT REGIONAL BLOOD TRANSFUSION CENTRE, ELDORET, KENYA -ASSESSMENT OF THE PREVALENCE OF Chlamydia trachomatis INFECTION IN DONATED BLOOD AT REGIONAL BLOOD TRANSFUSION CENTRE, ELDORET, KENYA. Put new part here; Place and Duration of Study- for a period of one month while the place already mentioned in the Tittle.

Line 52: Ten (10) milliliters – The highlighted was removed.

Line 96-98: How did the author know this information, because they pick up the blood pages after they donate.-By use of the questionnaire that is mandatory to be filled by the donor before any blood donation.

Line 102: To detect..... – Detection of.....

Added some information on discussion after line 133.

Line 138: Added a comma

References: Correction made following the journals guidelines.

Where is the other parts; competing of interest, acknowledgments; Author contributions: Patricia Chemutai is the researcher and Ramesh Francis and Frank Kombo are the research supervisors. All have been added.
