SDI EDITORIAL COMMENTS FORM

EDITORIAL COMMENT'S on revised paper (if any)	**Authors' response to editor's comments**
In the discussion let the author explain to the reader what the findings mean? Let the author discuss by comparing the work with other researchers-consistent with the author's findings (**THE NEED OF CITATION**). Indeed, the author should interpret the results in light of what was already known about (**THE NEED FOR CITATION**). With these views one reference (**CITATION**) within discussion is not enough. The author be given more chance to improve this section. Indeed, more time is needed to improve on typos such as removing periods (.) in some lines such 40,46,55,58, 133 etc.	**Thank you for your valuable suggestions.** **Thank you**
