**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<p>A multiparametric analysis is recommended. Supplemental data should be included for full data evaluation and understanding of the statistical analysis.</p> <p>Results should be better explained, especially statistical analysis. A data table showing BM fibrosis at presentation and after one year would be interesting for individual assessment of patients</p>	<ul style="list-style-type: none"> <li>As regarding multiparametric analysis, we currently have another study (in progress) with a larger number of patients and also to compare other TKIs in use.</li> <li>We updated the results section (highlighted)</li> </ul>
<b>Minor</b> REVISION comments	Title should be changed for including Lon-term evaluation of imatinib effect on bone marrow fibrosis	We changed the title to the title you suggested (highlighted).
<b>Optional/General</b> comments		

**PART 2:**
