<p>1. Shouldn’t this be termed “proportion” instead of “prevalence”?</p> <p>The question above needs to be answered; when the question has been answered, the paper may be published accordingly.</p>	<p>Thanks for interesting and valuable comments made on this manuscript.</p> <p>“Proportion” may be correct but authors of the manuscript think “prevalence” is appropriate as it indicates the percentage of participating inmates out of a study sample who harboured any parasite in stool sample. Prevalence indicates also a proportion but prevalence is more recommended in epidemiological studies.</p>
