PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
I am please to note that all the remarks have been well taken into account and corrected. Nevertheless, I noticed that the prevalences in the abstract concerning some species of parasites (<i>E. histolytica/dispar</i> , <i>E. coli</i> , <i>G. intestinalis</i> , <i>C. mesnili</i> et <i>B. hominis</i>) remain different from those in Table 1. It is to correct.	Thanks for interesting remarks of the reviewer. The required revisions concerning prevalence in the abstract section have been made accordingly.
