Title of the Manuscript:	Primary Malignant Melanoma of brainstem medulla mimicking as cavernoma – Case Report
Type of the Article	Case study

**General guideline for Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<b>This is a well written case report. There are few remarks to be made.</b> <b>Was the patient followed up after discharge?</b> <b>Was written consent signed by the patient?</b>	<ul style="list-style-type: none"> <li>Surgery of patient was done in 2016 and after the discharge of patient, there was no follow up of patient in Aga Khan University Hospital, therefore there is no followup electronic record of patient after discharge in our database.</li> <li>Multiple attempts were made to contact patient and relatives but contact could not be made therefore written consent could not be obtained.</li> <li>Exemption for ethical approval regarding this case report has been obtained from ethical review committee of Aga khan university hospital after thorough review and requirement of signed consent form is waived.</li> <li>I have Attached the ERC exemption letter with the email</li> </ul>
<b>Minor</b> REVISION comments	<b>Introduction:</b> "Primary malignant melanoma of central nervous system is very rare and accounts for 1% of all cases (...)" Acronyms (CT, MRI, SOL, CNS, etc.) need to be explained.	Since the referenced article from which the statement "Primary malignant melanoma of central nervous system accounts for 1% of all cases of melanoma" is obtained has not explained the statement, I have removed this statement from my case report. Acronyms explanation is added to the case report
<b>Optional/General</b> comments		

**PART 2:**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Are there ethical issues in this manuscript?</b>	<i>(If yes, Kindly please write down the ethical issues here in details)</i>	There are no ethical issues in this case report Exemption for ethical approval regarding this case report has been obtained from ethical review committee of Aga khan university hospital I have Attached the ERC exemption letter with the email
