PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>This revised manuscript was improved in some areas of the text, however, I consider that structure of introduction is not adequate for a research paper; the use of headlines is not common in this kind of paper. Also method section is in some parts weak, the same occurs in discussion. These sections require a deep review and structural changes.</p> <p>It seems a preliminary work and short communication is not detected.</p>	<p>A deep review and structural changes of the manuscript has been affected in areas of introduction, methods and discussion. All corrections are highlighted in yellow.</p>
