

Editorial Comments:

This an average paper but it is important to give impulse to research from emerging country. Therefore, the authors must indicate the ECT methodology in M&M.

The style should be also revised (e.g. 'Study was a retrospective study')

Author's Feedback:

Thank you for considering our journal for publication in your journal. This will surely encourage us to do better. The ECT methodology has been indicated in the write-up and we have also tried to improve on the style.
