PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	<p>The title and the idea of the research is very interesting and innovative but:</p> <p>1. The aim and benefit were not clear as the author did not specify the importance and seriousness of the infection of the cancer tissueswith bacteria.</p> <p>2. In the introduction: it was not attractive in writing, where, I hope that the author wrote about the incidence of lung cancer in camels and how it is dangerous to the animal life , especially, and on livestock in general ? What are the types of other cancers that may affect camels and then what bacteria that Infect the cancer tissues?</p> <p>3. In the methods: the author did not specify the precautions taken to collect the samples in order to avoid the injury of the tissue under study with external bacterial infection, which could affect the results of the research?</p> <p>4. In the discussion: the lack of clarity of the research idea led to the fact that the discussion was not objective, did not add new reasons for the occurrence of the disease or the seriousness to the search filed for livestock and animal health.</p>	<p>1. To investigate the relationship between tumor and bacteria. (addition was done).</p> <p>2. The previous studied were added</p> <p>3. Done</p> <p>4. Generally the tumors in camel are rare in compare with other diseases, so we need to determine the incident of these cases and reported them. Also screening for bacteria present in cancer tissues may open up new dimensions in our understanding of this relationship, and its importance, if any</p>
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
