PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The authors have presented a rare site of gallbladder cancer metastasis. I have following comments: 1. The title needs to be revised as "Inguinal lymph nodes as a rare site of gallbladder cancer metastases" 2. Please mention the detailed CT report of the patient with special emphasis on the presence or absence of liver, peritoneal, lymph nodal, lung and bone metastases. 3. Was PET scan done in this patient? If yes then what were the findings? 4. I believe that patient had bilateral inguinal lymph nodal metastases. So please mention bilateral lymph node metastases throughout the manuscript and not just left inguinal metastasis. 5. Please provide detailed liver function test report. 6. Were tumor markers done? If yes then what were the values? 7. Please provide a brief review on the treatment of patients of gallbladder cancer with inguinal lymph nodal metastases and their survival.	Manuscript revised as per the instruction and highlighted by yellow shade.
Minor REVISION comments	1. There are several grammatical mistakes throughout the manuscript which needs to be corrected.	
Optional/General comments
