PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Please specify the abbreviation term in abstract ,No ADC,DWI It should be mentioned in full form . Simple bar ,pie diagram should better be avoided. One single table showing conglomeration of all results is better.	Agreed with the reviewer as it gives more information. The full forms are highlighted in yellow in manuscript. Simple bar, pie diagrams are avoided in agreement with the reviewer as it has already been incorporated in the text
Minor REVISION comments	Statistical analysis results can be given in a table. Some references are not in proper Vancouver style.	Followed the reviewer guidelines.
Optional/General comments	Good study ,may help in patient benefit ,cases are good ,But does it cost effective to patient ? Nowadays ADC Values are being used in different tumours of body.	A single sequence of MRI is done which needs no I/V contrast and hence do not add much burden on the patient.
